

Registration of optional courses for the academic year 2020/2021

the FIRST round of the registration is opened

from 6th April by 12th April 2020

Registration should be done electronically via UIS <http://is.czu.cz/>

Every student of a **bachelor** study programme:

- Environmental Engineering – The student must take one core optional course Type 1 during the 2nd year of the study and the student must take one core optional course Type 2 during the 2nd year of the study.
- Geographic information systems and Remote sensing in Environmental Sciences - The student must take at least two core optional courses Type A during the second and third years of the study. For those taking final exams in Ecology and Nature Conservation, a combination of Habitat Ecology and Nature Conservation is recommended. For those taking final exams in Hydrology and Water Management, the combination of Water Management and Climate Change and Water Resources should be the preferred one. The student must choose from those courses in the second and third years of study in a way ensuring that he/she earns in total (combining these with compulsory courses and core optional courses) 180 credits over the entire study period. In other words, the student must earn at least 35 credits during his/her studies combining core optional (Type A) and optional courses (Type B)

Every student of a **Master's degree** study programme proceeding to the 2nd year of study has to choose the courses from the actual offer of the optional courses for the academic year 2020/2021. The minimum credit limit is set by the study plan of the relevant study programme. The list of the optional courses that are currently offered is available on the FES website – Study – Information for students and on Study Administration Office notice boards.

The SECOND round of the registration is opened

from 20th April by 26th April 2020

During the 2nd round, a student has to check the chosen courses – if they are opened or not. If the chosen course is not opened, the student has to replenish his list of optional courses (with the opened ones) during the period of the second round.

A notice to students:

The courses have to be opted in the set periods (rounds) with your careful consideration. Additional cancellation of the optional courses (via written request) out of the periods of the first and second rounds is possible only during the first two weeks of the winter semester 2020/2021 academic year.

The timetable of the optional courses can coincide with the courses that are already scheduled.

doc. Ing. Jan Skaloš, Ph.D.
Vice-Dean for Teaching and Learning
